Stephanie was diagnosed in Dec '05 with osteosarcoma, a highly rare bone cancer. Over the last seven years, Stephanie has had to travel to M.D. Anderson Cancer Center in Texas for treatment. Recently, Stephanie was told by her doctors that she may be facing her toughest battle yet as her tumors continue to grow despite aggressive treatment. The money raised by this benefit will help lessen this huge financial burden on her family and allow Stephanie and her husband Sammy one less thing to worry about.
